The good performance was as a result of strong earnings in the squid and lobster divisions of the business.

Our abalone business has produced results in line with management's expectations while we focus on our expansion plans with increased performance expected to be achieved during the 2019/2020 financial year when expansion is completed and pipeline fully secured.

## REVIEW OF OPERATIONS

### Lobster

The 2018 total allowable catch ("TAC") for south coast rock lobster ("SCRL") is 335 tons up by 1% from the prior year TAC of 331 tons. The quota which is available to Premier is 135 tons (2017: 133 tons).

The 2018 TAC for west coast rock lobster ("WCRL") remained unchanged from the prior year at 1 924 tons, however, the offshore allocation decreased from 1 204 tons to 995 tons. The quota which is available to Premier is 64 tons (2017: 87 tons). The total WCRL contracted quota acquired for 2018 is 101 tons (2017: 96 tons). WCRL contribution to revenue and profits of the Group is less than 15%.

The Group experienced increased landings due to good catch rates for the lobster division as well as bigger size mix for SCRL. The bigger size mix resulted in the Group achieving an increase of 3% in US dollar pricing for SCRL as compared to the prior period. The increased landings also resulted in increased sales volumes for the division as compared to the prior period. The good catch rates, increased market prices and volumes resulted in the division maintaining its margin despite the strengthening of the Rand against the dollar in the first half of the financial year.

### Small pelagics

The Group's 2018 quota allocation for pilchards is 4 396 tons (2017: 3 383 tons). The catch rates for pilchards was lower than that of the prior year, industry-wide resulting in lower landed and sales volumes of Pilchards in the current year. Industrial fish catch rates were the same as those experienced in the prior year. The lower landings and sales volumes for Pilchards resulted in lower revenues and operating profits for the division in the current year.

### Squid

The acquisition of Talhado resulted in the increase in fishing rights and the number of fishing vessels utilised for squid from four vessels in the prior year to 22 vessels in the current year. The squid industry experienced exceptional catch rates in the current period. The landed volumes and sales volumes for the division were more than double those of the prior period. The market for South African squid remained stable despite the significant increase in landed volumes and the Euro sales prices achieved by the Group were the same as the prior period. The exceptional catch rates, increased sales volumes and consolidation of Talhado from 9 May resulted in an increase of 431% in operating profits of the division.

Revenue of R80 million and profit after tax of R29 million has been consolidated from Talhado for the year ended 31 August 2018.

## **Hake**

The 2018 TAC for hake is 133 119 tons. The quota which is available to the Group is 700 tons. The Group's hake quota is caught, processed and marketed through a joint operation with Blue Continental Products Property Limited ("BCP") Hake. The catch rates for the division were similar to those of the prior period and the division also experienced a bigger size mix for its catches. There were unexpected major repairs and maintenance work done to the fishing vessel due to a breakdown which resulted in operating profits for this division being lower than the prior year.

## **Abalone**

The Group commenced with construction of the expansion of the abalone farm. 40 tons of additional animal rearing capacity have been added to date and construction is anticipated to be completed by the end of Quarter 1 in 2019. The division is currently focused on increasing its spat ("Baby Abalone") production and stock holding in preparation for the farm's expansion. Sales volumes for the period were less than those of the prior period as the Group is growing out the animals to a bigger size for the market. Sales volumes are expected to increase once construction at the farm has been completed. The stock value increased by 25% from the prior year and this volume will be realised in the coming financial years. It is the Group's intention to increase the stock value in line with the abalone expansion plans.

## **Horse Mackerel**

The Group was awarded a horse mackerel quota of 800 tons during the FRAP2015/2016 process. The Group's horse mackerel quota is caught, processed and marketed by Dessert Diamond Fishing Property Limited. 100% of the quota was caught during the current period.

## **Seagro**

Seagro is an organic fertiliser produced from Fish Oil which is a by-product of the Fishmeal making process.
